IEBA

PROVIDING EDUCATIONAL OPPORTUNITY

IEBA
International Employee
Benefits Association

Providing Educational Opportunity

4 VALUES WHICH DIFFERENTIATE IEBA

1

INTERNATIONAL

The International Employee Benefits Association (IEBA) is a platform for people with an active role in the field of *international* employee benefits. It offers membership to representatives from multinational companies, providers and the consulting community.

2

EDUCATION AND NETWORKING

IEBA offers two distinct educational programmes in international employee benefits, the IEBA Diploma, and a practitioner certification, the IEBA Certified Practitioner. *

Education and knowledge sharing is the fundamental vocation of IEBA which has led to an increasing presence of IEBA local branches worldwide , each one conducting an active local events programme. In the same way education and networking is also the central and sole objective of the highly successful IEBA annual conference.

An open and collaborative like-mindedness is reflected in a common international sense of purpose to share knowledge and best practice. Alongside education, networking and intellectual exchange provide further added value to IEBA membership.

3

IMPARTIAL AND NON COMMERCIAL

A structural strength of IEBA is that of independence and neutrality allowing for fair and inclusive commentary from all parties involved in the field of international employee benefits.

4

NOT FOR PROFIT

A not- for- profit mentality is a key factor and helps IEBA provide value for money.

This helps keep membership fees and the fees for the IEBA annual conference at a low level. A major objective of IEBA is to encourage maximum participation by the international employee benefit community in its educational activities without regard to profit. IEBA is greatly assisted in achieving this goal by the generous support of sponsors from the employee benefit industry.

* In addition to the Diploma and Certified Practitioner facilities, IEBA offers educational opportunity through the provision of reference materials, tutorial courses, on-line learning, webinars, a highly successful annual conference and regular local branch events.
